Message from the Guest Editors

Dear Colleagues,

The aim of this Special Issue “Intelligent Condition Monitoring of Wind Power Systems” is to collect and disseminate novel, intelligent, and autonomous condition monitoring techniques and their potential applications for wind power systems. Topics of interest for this Special Issue include but are not limited to:

- Development of condition monitoring systems including sensor systems
- Modeling and condition monitoring of electric machines and drives/wind power generation systems
- Power conversion system reliability
- Power electronic condition monitoring
- Condition monitoring of the interconnection/HVDC electronics
- Performance analysis of wind turbines and their connections
- Condition-based operation and maintenance strategies
- Physics-based modeling and data-driven modeling
- Signal processing and data mining
- AI- and CI-enabled techniques and applications

Dr. Xiandong Ma
Dr. Sinisa Durovic

**Message from the Editor-in-Chief**

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

---

**Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed by the Science Citation Index Expanded (Web of Science), Ei Compendex, Scopus and other databases.

**Rapid Publication:** manuscripts are peer-reviewed and a first decision provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the second half of 2019).
