GAMIFICATION ?

Nike Game World

A man in a grey t-shirt and black shorts is jumping high in the air, reaching for a large green rectangular block that is floating in the air. The background is a dark, industrial-looking building with a sign that says "GINGER LEE MAE" and "HAZARD". There are other people in the background, one of whom is holding a clipboard. The scene is set in a game-like environment, possibly a virtual world or a themed park.

Use of game mechanics
to encourage
engagement in an
activity that otherwise
might be considered a
chore or boring

GAMIFICATION ?

A man in athletic wear is seen from behind, standing on a rooftop with a green-tiled surface. He is looking out over a dense city skyline with various skyscrapers and buildings under a hazy sky. The text "OR GAMIFICATION?" is overlaid in large white letters across the lower half of the image.

OR GAMIFICATION?

Nike Game World

A person is seen from behind, running on a rooftop. They are wearing a blue and black athletic top and black shorts. The rooftop has a green grid pattern. In the background, a dense city skyline is visible under a hazy sky. A blue speech bubble with a white border is in the top right corner.

Encouraging certain
user behaviour
using Games as a
Lens

OR GAMIFICATION?

Nike Game World

WHATS IS A GAME MECHANIC?

“Game mechanics are rule based systems / simulations that facilitate and encourage a user to explore and learn the properties of their possibility space through the use of feedback mechanisms”

WHATS IS A GAME MECHANIC?

“Game mechanics are the rules, processes, and data at the heart of a game, They define how play progresses, what happens when, and what conditions determine victory of defeat”

ROLE OF FEEDBACK

Feedback in games is for
providing players control
NOT for controlling them.

CAN WE SIMPLY ADD FUN?

*“Game elements aren't the
monosodium glutamate of fun that
you can simply add to an activity to
make motivating and engaging” -*
  Will Wright

ALL GAMES AREN'T FUN

“Asking me which Elf Bowling 1 or 2 is better is like me asking you if you'd rather eat a spoonful of rat turds or hamster turds” IGN

Review 2005

ALL GAMES AREN'T FUN

“Asking me which Elf Bowling 1 or 2 is better is like me asking you if you'd rather eat a spoonful of rat turds or hamster turds” IGN

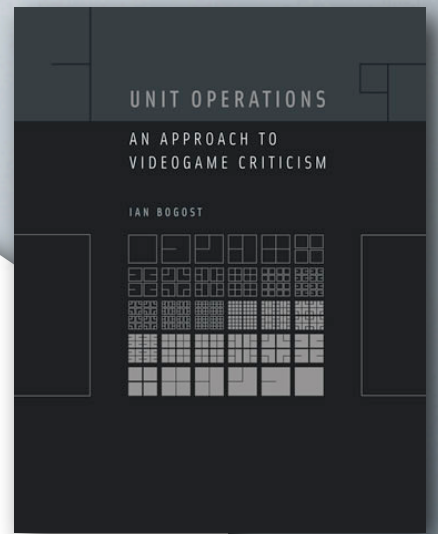

Review 2005

*“Games are not fun
because they’re
games, but when
they are well-
designed”- Sebastian
Deterding*

GAMES AS PROCEDURAL RHETORIC

In a procedural medium, meaning is communicated through participation. It is through the process of interacting with a computer program that people activate and perceive the procedural rhetoric.

GAMES AS PROCEDURAL RHETORIC

NEW?

 IS IT  REALLY
 NEW?

Good Service Contest

The Good Service Contest is held daily for all Cocktail Bunnies. The daily winners receive merits for having achieved the highest drink average through excellent service. The Monthly Good Service Contest is won by the Bunny who has won the most daily contests that month. Awards are as follows:

First place....25 merits plus 1 merit for each daily contest won that month;
choice of schedule* for one week.

Second place...15 merits plus 1 merit for each daily contest won that month.

Third place....10 merits plus 1 merit for each daily contest won that month.

Ties:

Tie for first place reaps duplicate awards and omits second place while third place remains the same.

Ties for second place delete a third place winner.

Ties for third place pay each girl duplicate awards.

Acting

cliff.
You are standing on the edge of a cliff surrounded by forest to the north and a river to the south. A chill wind blows up the unclimbable and unscaled heights. At the base of the cliff you can just make out the shapes of jagged rocks.

*w
As you approach the edge of the cliff the rock starts to crumble. Hurriedly, you retreat as you feel the ground begin to give way under your feet!

*leap
You are splattered over a very large area, or at least most of you is. The rest of your remains are, even now, being eaten by the seagulls (especially your eyes). If you had looked properly before you leaped you might have decided not to jump!
would you like to play again?

Like to impose themselves on others

NISSAN ECO PEDAL

When the system is on, "each time the driver steps on the accelerator, a counter push-back control mechanism is activated if the system detects excess pressure, helping to inform the driver that they could be using more fuel than required."

Studies by Nissan have found that the ECO Pedal system can provide fuel savings of 5-10%, depending on driving conditions.

PROGRESSIVE GROKKING

“Playing video games is fun because it provides experiences of competence, self-efficacy, mastery” - Ralph Koster

CONCLUSIONS

- Games design and user experience design have emerged from different worlds but are converging to create new approaches to design.
- Simply adding points or badges does not in itself make things fun.
- Feedback is for providing not taking control.
- The meaning of an activity is communicated through participation and people will participate for all sorts of reasons.
- Whilst Gamification is often touted as not creating games it should prevent you using game design techniques when designing such systems.
