# Lets talk about power

Researchers from Lancaster University have been studying the different ways residents involved in community action worked together to improve their neighbourhoods. We developed a power framework to help us understand different forms of power and how it can support or limit community action. We want your help to turn this framework into a tool for community action. We think you will learn about how you can use and/or resist different forms of power to help achieve your aims.

Workshop: 23rd May 9.30am to 2.00pm  
at Saint Chad's Church, Torrisholme Road
